Syllabus for certificate course

Sr. No.	Topic
1	Drug Discovery and Development – An overview
2	Clinical Trial: History, Present and Future
3	Definitions in clinical research
4	Various stakeholders in clinical research
5	Clinical research process flow
6	Clinical trial monitoring, Audit and Inspection
7	Regulatory guidelines in various countries- New CT Rules 2019 (India)
8	Essential Documents in clinical research

Note:

Modules were be provided on registered mail ID with Ingenious Healthcare.

The online sessions were conducted through Zoom meeting. Minimum one to two sessions were conducted weekly.

Principal
Indra Institute of Farmacy

Fax: 02354-241499

E-Mail: info@iip.ind.in

Web: www.iip.ind.in

Course outcome

1. Promoting a comprehensive understanding of the broad area of clinical research
2. Developing a theoretical understanding of the concept and correlating into relevant practice area.
3. Developing and perceiving a rationale for the conduct of clinical research activities.
4. Acquiring sufficient preparatory knowledge for more detailed studies in clinical research.

Course Outcome

1. Pharmacovigilance deals with assessment and prevention of adverse drug effects of drug and health product.
2. The objective of course to enhance patient care and safety in relation to use of medicine.
3. To promote safe and effective use of drug
4. To gain in-depth knowledge on the best way to collect and report adverse events and safety data and manage the risk associated with and risk to pharmaceutical and nutraceutical products.

Syllabus for certificate course

Sr. No.	Topic
1	Overview of healthcare system- medical coding companies in India, Scope, Opportunities, Qualification, Training required
2	Components of US healthcare including top 10 US insurance companies
3	Different types of Insurance- Federal, State, Private
4	History and need of coding
5	Revenue cycle management
6	Definitions in Coding, billing, medical summarization, reviewer, charge entry, payment posting, AR caller
7	What is medical billing and its cycle
8	Basic terminology and components of billing – co-insurance, co pay, deductible, allowed amount, paid amount
9	Guidelines for medical coding / CMS coding guidelines
	Different code structured available and their digits, with different reference books for coding
	ICD and its Chapters (3 to 7 digits code)
	CPT service code (5 digits)

Web: www.iip.ind.in

Course Outcome

Upon successful completion, students will have the skills and knowledge to:

1. Examining patient charts and histories to ensure coding accurately reflecting a patient's medical care.
2. Become a Coding specialist who is proficient in assigning alphanumeric codes to every individual diagnosis and medical procedure.
3. Examining operative reports used during surgery to apply procedure codes.
4. Understand and apply the research process in the selection of proper codes in the CPT and ICD-9- CM manual.

E-Mail: info@iip.ind.in

Web: www.iip.ind.in

Course outcome

Upon successful completion of this course, students should be able to:

1. Describe the fundamental elements of relational database management systems
2. Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL.
3. Design ER-models to represent simple database application scenarios
4. Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data.
5. Improve the database design by normalization.
6. Familiar with basic database storage structures and access techniques: file and page organizations, indexing methods including B tree, and hashing.

Syllabus for certificate course:

Sr. No.	Topic
1	Drug Discovery and Development – An overview
2	Clinical Trial: History, Present and Future
3	Definitions in clinical research
4	Various stakeholders in clinical research
5	Clinical research process flow
6	Clinical trial monitoring, Audit and Inspection
7	Regulatory guidelines in various countries- New CT Rules 2019 (India)
8	Essential Documents in clinical research

Note:

Modules were be provided on registered mail ID with Ingenious Healthcare.

The online sessions were conducted through Zoom meeting. Minimum one to two sessions were conducted weekly.

Syllabus for certificate course:

Sr. No.	Topic
1	Overview of healthcare system- medical coding companies in India, Scope, Opportunities, Qualification, Training required
2	Components of US healthcare including top 10 US insurance companies
3	Different types of Insurance- Federal, State, Private
4	History and need of coding
5	Revenue cycle management
6	Definitions in Coding, billing, medical summarization, reviewer, charge entry, payment posting, AR caller
7	What is medical billing and its cycle
8	Basic terminology and components of billing – co-insurance, co pay, deductible, allowed amount, paid amount
9	Guidelines for medical coding / CMS coding guidelines
	Different code structured available and their digits, with different reference books for coding
	ICD and its Chapters (3 to 7 digits code)
	CPT service code (5 digits)
	CPT core structure
	Different chapters in CTP book
10	Definition of Modifiers and reason to use modifiers

Course outcome

Upon successful completion of this course, students should be able to:

1. Describe the fundamental elements of relational database management systems
2. Explain the basic concepts of relational data model, entity-relationship model, relational database design, relational algebra and SQL.
3. Design ER-models to represent simple database application scenarios
4. Convert the ER-model to relational tables, populate relational database and formulate SQL queries on data.
5. Improve the database design by normalization.
6. Familiar with basic database storage structures and access techniques: file and page organizations, indexing methods including B tree, and hashing.
