The Registrar,
University of Mumbai
M.G. Road, Fort, Mumbai - 400 032
Maharashtra

15 JUN 2021

Sub: - Recognition of College under Section 2 (f) of the UGC Act, 1956.

Sir,

I am directed to refer to the letter no. IIP/UGC 2(F)/12(B)/179/2020-21 dated 08.02.2021 received from the Principal, P.S.P. Sanstha's Indira Institute of Pharmacy, A/P-Sadavali (Devrukh), Tal. Sangameshwar, Dist. Ratnagiri-415 804, Maharashtra on the above subject and to say that it is noted that the College is un-aided/self-financed and temporarily affiliated to University of Mumbai, Mumbai. I am further to say that the name of the following College has been included in the list of Colleges prepared under Section 2(f) of the UGC Act, 1956 under the head 'Non-Government Colleges teaching upto Bachelor's Degree'-

Name of the College	Year of Establishment	Remarks
P.S.P. Sanstha's Indira Institute of Pharmacy, A/P-Sadavali (Devrukh), Tal. Sangameshwar, Dist. Ratnagiri-415 804, Maharashtra. AISHE CODE:- C-34110	2008	The college does not fulfill the requirement of permanent affiliation. Therefore, the college is not eligible to receive Central assistance under Section 12B of the UGC Act, 1956.

The Indemnity Bond and the other supporting documents submitted in respect of the above College have been accepted by the University Grants Commission.

Yours faithfully,
(Tirath Ram)
Under Secretary

Copy to:-

Dear Sir / Madam,

Greetings from NAAC,
Merry Christmas & Happy New Year 2019

Sub: Pilot Study of NAAC Manual of Health Sciences for Colleges from 27th December 2018 –reg

This is in continuation of our telephonic conversation with you and your acceptance to partner with us for pilot study. Thank you for the same.

It has been planned to do pilot study of newly developed NAAC manual of Health Sciences for Colleges in selected Health Sciences Colleges from **27th December 2018** and the Pilot study closes on **15th January 2019**. In this regard we glad to inform that yours is one of the prestigious Colleges selected for pilot study. **After the Pilot study, kindly send duly filled in data templates along with the response sheet in the excel format provided by NAAC.**

This will also help the Institution to understand new process in RAF related to Health Sciences Colleges. Those Colleges which are likely to come to NAAC for A&A within next one year can prepare in advance as well.

Kindly nominate **IQAC Director/ Co-ordinator** and send us name & contact details as early as possible and also inform the same to him/her.

We are sending herewith following documents related to Pilot study:

1. Handbook for Pilot study.
2. Manual of Health Sciences for Colleges (Complete final version with Part A & Part B)
3. Extended data sheet and Excel sheet for recording response.
4. IIQA for Colleges & Student Satisfaction Survey (SSS) questionnaire

Your valuable inputs/suggestions/comments will be of great help to NAAC to understand ground realities and fine tune the tool / instrument itself and also to evolve benchmarks.

Your cooperation is very much solicited in this regard.

Regards

Yours Sincerely,

(Director)

FEEDBACK / SUGGESTIONS ON THE DRAFT NHEQF FROM THE STAKEHOLDERS OF OUR INSTITUTE

To
Shri. Rajnish Jain
Secretary,
University Grants Commission (UGC)
Bahadur Shah Zafar Marg,
New Delhi - 110002.
011-23604446, 011-23604200.

Subject: Feedback/ suggestions on the draft NHEQF from the stakeholders.....reg.

Reference: Your notification published on the UGC website in January 2022. (F.No.15-2/2021 QIP)

Respected Sir

Adverting to the above-cited subject and reference as one of the stakeholders we wish to give the following feedback/ suggestions with respect to our pharmacy programs as requested by you on the draft copy of NHEQF.

1. Medicine and law are out from this NHEQF, with reference to this we also feel that even Pharmacy being a professional course should also be out from the NHEQF.
2. Exit after every year at levels 5, 6 and 7 to get a certificate, diploma, or degree after 4 years (but level 7, i.e. degree with no status of research) can undermine the value of pharma graduates. The industry will get the laborers at a lower cost and the median salary of pharma graduates can be a challenge. M Pharm is not mentioned at level 9.
In Table 11, B. Pharm is not mentioned, but B.E. or B. Tech. programs which are of 4 years are mentioned at level 7.
3. Entry to level 10 (Ph. D.) can also be after Bachelor's degree (Hon./research).
But considering B. Pharm as just Bachelor's degree (and not Hon/Research) as per the draft copy definition, entry to Ph. D. directly after B. Pharm may not be permissible.
4. After every year, exit is possible for students. Students: teacher ratio and appointment of permanent teacher can be uncertain in such kind of situation. Also estimate of fees, budget and running of the institute in a financially viable way for self-financed private institutes can be a difficult task.
5. Like in a Western country, Pharmacists should serve a strong link between physicians and patients, but with a certificate, diploma, degree level of splitting of programs, recognition to Pharmacist as Clinical Pharmacologist can be still difficult.

Thanking you

Yours sincerely

GAZETTE NOTIFICATION PUBLISHED ON THE
CDSCO WEBSITE DATED 09/02/2022

To
Central Drugs Standard Control Organization (CDSCO)
Directorate General of Health Services,
Ministry of Health and Family Welfare,
Government of India FDA Bhavan,
ITO, Kotla Road, New Delhi -110002

Subject: Objection on GSR 104(E)_Regulation of sale of medical devices via registration of premises under MDR, 2017 Reg.

Reference: Your Gazette notification published on the CDSCO website dated 09/02/2022.

Respected Sir/ Madam

Adverting to the above-cited subject and reference, we sincerely express our objection to the draft GSR 104(E)_Regulation of sale of medical devices via registration of premises under MDR, 2017 to amend rules for issuing a certificate of registration for sale or distribute medical devices including *in vitro* diagnostic medical device to 12th pass persons with one year experience or to any graduate. We confirm that lakhs of registered pharmacists throughout the nation are already jobless and moreover it's a matter of Public Health, hence it should not be handed over to any unqualified person in the pharmaceutical sector. We request you to rethink and consider our appeal for the same before making a final decision.

Instead, we strongly suggest an amendment to the existing Law that, the Government of India should allow drug licenses also to be issued only to the registered Pharmacists, make sure that other than registered pharmacists no one can become owner/proprietor/director of Medical stores/ Pharmacy.

Thanking you

Yours sincerely

Subject: Objection on GSR 104(E)_Regulation of sale of medical devices via registration of premises under MDR, 2017 Reg.

Reference: Your Gazette notification published on the CDSCO website dated 09/02/2022.

Respected Sir/ Madam,

Adverting to the above-cited subject and reference, we sincerely express our objection to the draft GSR 104(E)_Regulation of sale of medical devices via registration of premises under MDR, 2017 to amend rules for issuing a certificate of registration for sale or distribute medical devices including *in vitro* diagnostic medical device to 12th pass persons with one year experience or to any graduate. We confirm that lakhs of registered pharmacists throughout the nation are already jobless and moreover it's a matter of Public Health, hence it should not be handed over to any unqualified person in the pharmaceutical sector. We request you to rethink and consider our appeal for the same before making a final decision.

Instead, we strongly suggest an amendment to the existing Law that, the Government of India should allow drug licenses also to be issued only to the registered Pharmacists, make sure that other than registered pharmacists no one can become owner/proprietor/director of Medical stores/ Pharmacy.

Thanking you

Yours sincerely

21/02/2022

Letter of Appreciation

Dear Sir/Madam,

Please accept our sincere gratitude to all the chief functionaries and every members of the IIC Institution's Innovation Council (IIC) of Prabodhan Shikshan Prasarak for the continuous support and contribution towards building the innovation and entrepreneurship culture development in your campus and also extending support to help other IIC institutions towards growth of the IIC network during the academic year 2021-22.

Chief Functionaries of the IIC at Prabodhan Shikshan Prasarak, Ratnagiri

Name	Position
Mr Sumeet M Kharat	President
Sumeet Kharat	NISP Co-ordinator
Mr. Vivek S. Kulkarni	Internship Activity Coordinator
Mr. Sujit K. Nagare	Vice President
Mr. Tanmay L. Patwardhan	Innovation Activity
Mr. Vipul A Sansare	Social Media
Mrs. Ketaki S. Dhane	IPR Activity Coordinator
Mr. Sumit M. Kharat	Start up Activity Coordinator
Nikul N. Patel	Convener
Mrs. Medha A. Khade	NIRF Coordinator
Ms. Nikita G. Goonkar	ARIIA Coordinator

As we are progressing towards a 'quality' driven I&E ecosystem development, we strongly believe that the IIC model and its unique structure is definitely putting your HEI's thoughts, actions and aspirations in a systematic way to achieve inclusive and holistic development of the ecosystem.

Thank you & regards.

Yours Sincerely,

Dipan Kumar Sahu

A Report on a "Impact Lecture Series" Session II

Date: 02nd July 2022

IIP institute innovation council has successfully completed session 2 of the impact lecture series. The impact lecture series is sponsored by the ministry of educations, AICTE, and the ministry of HRD's IIC. The complete series was bifurcated into 2 sessions. The first session of the impact lecture series was completed on 18/06/2022. The Second session of the impact lecture series was conducted on 02/07/2022.

The Inauguration of the session was started with the formal introduction of the session by Convener IIC by Mr. Nikul Patel at 9:30 a.m. Further, the principal Dr. Amol B. Khade of the institute expresses the objective of the session. They concluded by expressing thanks to the MoE, AICTE, and IIC for providing the sponsorship for the impact lecture series. The second session of the series comes with two different topics from two separate guest speakers. The first topic of the session was "Scope of innovation in the Pharmaceutical industry" The first lecture starts at 10:00 a.m. Mr. Sachin Lokapure was the resource person who deliver an excellent session on the above-mentioned topic. Mr. Lokapure sir covers multiple points and lastly compiles them together, and explains how these are correlated. While correlating this Mr. Sachin sir, starts with startup procedure, IPR and patenting, funding, and research grant. How these parameters are useful and can use as a business tool he explains in his session. Furter he simulate his presentation for a better understanding of the topic. At last, he provides some case studies which bring the topic to the next level. At the end of the first lecture, participants' queries were resolved by Mr. Sachin Lokapure sir. The gratitude towards the first eminent speaker was expressed by Mr. Sumeet M. Kharat (IIC President).

The second topic of the session was "Role of incubation center in startup journies" The second lecture starts at 11:30 a.m.

Mr. Sachin Kumbhoje was the resource person who deliver an excellent session on the above-mentioned topic. Mr. Sachin Kumbhoje starts his session in an innovative way. The session starts with a formal question-answer session which gives idea to speaker the current knowledge of the participants on the mentioned topic. Further, he explains the basic concept of an incubation center and how it will be beneficial to students and faculty. In his session, he explains the procedure of application of the incubation center and how it works for the benefit of the students. Also, he gives recent examples of some startups which are the results of the incubation center. At the end of the second lecture, participants' queries were resolved by Mr. Sachin Kumbhoje. The gratitude towards the second eminent speaker was expressed by Mr. Sumeet M. Kharat (IIC President) During the session, Ms. Sanika Narvankar introduces the first eminent speaker, while Ms. Gauri Thatte introduces the second eminent speaker. Overall 176 participants were benefited via this impact lecture series. Finally, the whole session was concluded with a vote of thanks by Ms. Akshata Jadhav. The session ends formality of feedback on sessions and assessments that have been taken. E-certificates were distributed to the participants on the attendance and assessment criteria.

A Report on a "Impact Lecture Series" Session I

Date: 18th June 2022

IIP institute innovation council has successfully completed session 1 of the impact lecture series.

The impact lecture series is sponsored by the ministry of educations, AICTE, and the ministry of HRD's IIC. The complete series was bifurcated into 2 sessions. The first session of the impact lecture series was conducted on 18/06/2022.

The Inauguration of the session was started with the formal introduction of the session by Convener IIC by Mr. Nikul Patel at 9:30 a.m. Further, the principal Dr. Amol B. Khade of the institute expresses the objective of the session. They concluded by expressing thanks to the MoE, AICTE, and IIC for providing the sponsorship for the impact lecture series.

The first session of the series comes with two different topics from two separate guest speakers. The first topic of the session was "Startup and Entrepreneurship opportunities in Healthcare." The first lecture starts at 10:00 a.m. Ms. Anjori Parendeekar (Mrs. Anjori Sachin Kumbhoje) was the resource person who deliver an excellent session on the above-mentioned topic. Ms. Anjori mam explains all modules for eneterprenerhip. During her session, she explores step by step process for any startup. Also, she makes aware participants during pandemic situations and how she can able to tackle new arising problems faced by any startup. She explains and evidences her talk with numerous case studies.

At the end of the first lecture, participants' queries were resolved by Ms. Anjori mam. The gratitude towards the first eminent speaker was expressed by Mr. Sumeet M. Kharat (IIC President) The second topic of the session was "The overview of the Indian patent with respect to global patenting system." The second lecture starts at 11:30 a.m. Dr. Umesh Bankar was the resource person who deliver an excellent session on the above-mentioned topic. Dr. Umesh explains both Indian as good ass global patenting systems separately. Further, he correlates both the system very well which brings more attention to the participants. Then, he proceeds with some simulating presentation, which clears all the process of patenting.

Principal

A Report of Webinar on “Awareness on Intellectual Property Rights”

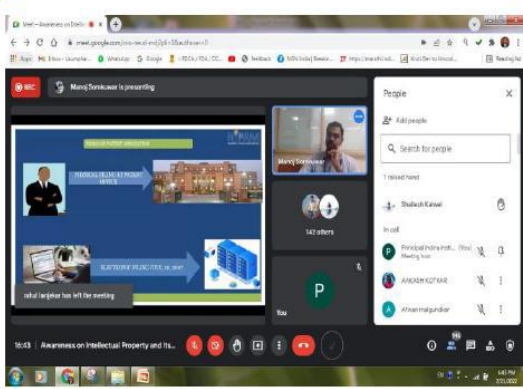

Date: 22nd February 2022

IIP Institute Innovation Council successfully conducted a Webinar on “Awareness on Intellectual Property Rights” on 21st February 2022. Mr. Manoj G Somkuwar was the resource person, who delivers an excellent session covering all the forms of IPR. Institute Innovation Council of our institute jointly organized this program with NIPAM, Ministry of Commerce, and under the banner Azadi ka Amrit Mahotsav. Students are well aware of patent, trademark, and copyright, with its application procedure. Mr. Manoj sir, conceptually clear the topic, considering the proper utilization of this tool towards the pharmacy students. Mr. Manoj sir made aware the students by simulation with resolving queries from students. IIC council members, in-house faculties, and students of the institute show their participation in this webinar. About 175 participants attended the webinar. The program was well organized by Mr. Sumeet M. Kharat (President IIC), Mrs. Ketaki S. Dhane (IPR Coordinator, IIC), and all members of IIC IIP, under the prominent leadership of I/C Principal Dr. Amol B. Khade sir. The webinar was concluded with a vote of thanks by Miss Nikita N. Gaonkar (ARIIA Coordinator, IIC) showing gratitude towards the recourse person and all the attendees of the webinar.

A Report on “One day national seminar of Research Methodology”

Date: 28th September 2019

IQAC of Indira Institute of Pharmacy has successfully conducted one day National level seminar on "Research Methodology" on 28th September 2019 at Indira Institute of Pharmacy, Sadavali. The seminar was organized in association with Student Scientific Club of IIP and sponsored by Urjau wellness research center, Goa. The seminar was organized mainly for UG, PG students and faculty to understand the research methodologies. For the inaugural function Hon. Shri. Ravindraji Mane (Chairman, Prabodhan Shikshan Prasarak Sanstha, Ambav), Sau. Nehaji Mane (Executive chairperson, Prabodhan Shikshan Prasarak Sanstha, Ambav), Dr. B.C. Hatpakki, Dr. Krishna Iyer (Professor, Bombay college of Pharmacy, Mumbai) and other dignitaries were present.

More than 125 delegates from Goa, Karnataka and Maharashtra were participated in the seminar. Students and delegates had wonderful experience to meet & listen scientific content & take home value from experts in the field. Dr. Krishna Iyer, Dr. Supriya Hyam, Dr.Rahul Dandage & Mr. A. B. Khade were present as the resource person.

INVITATION

One day national level seminar on
Research methodology

Dear delegates

It gives us immense pleasure to invite you for your participation in one day national level seminar on "Research Methodology" organized by PSPS's Indira Institute of Pharmacy. We will be glad to welcome you all for the seminar.

About Sanstha

The Sanstha was established in the year 1995, under the dynamic Chairmanship of Honorable Shri. Ravindraji M. Mane, Ex-Minister of state for Finance and Planning, Development, Irrigation, Water Supply and Sanitation, Government of Maharashtra, and Ex-Guardian Minister Ratnagiri District with objective of quality education to the rural people. The santha is running various institutions & imparting the education from KG to PG in different streams.

About the institute

Indira Institute of Pharmacy (IIP) was established in the year 2008, and is the only Pharmacy institute accredited by NAAC in the Konkan region. The institute was also ranked by AICTE CII Survey ranking under GOLD category for the year 2018. The institute has very strong industry institute interaction with Adler Mediquip. As the landmark, we believe in changing our teaching methodologies in accordance with the changing scenario's of Pharmaceutical industry. We have established our self as the leading institute in research through the consultancies and various research activities conducted persistently. We believe in quality and excellence and we are continuously striving to achieve the same.

Our Vision....

To be a prime source of pharmaceutical education in Konkan region for developing globally competent and professional pharmacists.

Our Mission....

- To imbibe scientific and technical knowledge with ethical values to our students.
- To impart personality development skills to the students.
- To encourage and support faculty at par with the recent trends in pharma profession.
- To contribute to the national healthcare system by providing competent pharmacists.

About Seminar:

The research projects are not only mandatory for PG & Research Scholars but also for UG students as per newly designed curriculum. In view of this we have organized this seminar to cater the needs of students.

Salient Feature of Seminar:

- To design project proposals.
- To implement proper research methodologies.
- To provide hands on training of reference manage software. (Participants are advised to bring Laptops for training)
- To familiarize with effective poster presentation and publication in peer reviewed journals.
- To promote research collaborations
- To provide MoU opportunities.

Speakers Name :

1. **Dr. Krishna Iyer,**
BOS Chairman, University of Mumbai.
Professor and Head, Dept of Pharmaceutical Chemistry,
Bombay College of Pharmacy, Mumbai.

Dear Sir,

This is as discussed few days back.

You are offering us cleanroom fumigation as well as bio-burden testing service for quite a few years. It has helped us quite a lot, especially in the day by day growing needs of FDA regulations. We are thankful to you & your institute for the same & we also intend to continue this services in future.

While we are maintaining the facility as per the FDA requirements, knowledge of the people handling the operations of the clean room is very important. We intend to conduct a training session for the staff members with the help of your institute, which is intended to upgrade knowledge of our people regarding the micro-organism & other related topics.

We request you to pls. accept our request as a resource person for this training session & cover all the necessary topics. One of the area which we want you to cover is to explain the Test report that you submit after every fumigation cycle.

We can mutually agree upon the date & time of this session as per your convenience.

With Best Regards,

Adler Healthcare Pvt.Ltd.

To,
The Principal,
Indra Institute of Pharmacy,
Sadavali.

Dear Sir,

We at Adler Mediequip Pvt. Ltd. MIDC, Sadavali, intend to establish process of Titanium Anodizing. As per requirements, we are using below acids.

Considering the possibility of hazards during the handling of these acids, we request you to provide your expert advice / assistance to prepare SOP for Handling / Storage & Disposals as well as preparing guidelines in case of accidents etc.

Although we have the standard MSDS data available, we intend to correctly interpret & articulate the instructions with your faculty expertise, which will make it easier to understand & follow on the floor.

Request your co-operation as usual.

Please refer the below details of chemicals and ratio of mixing.

3.1.1. Anodizing Surface preparation Tank

1. Take Hydrofluoric acid and Nitric Acid, prepare solution 15ml HF and 4l Ni Acid

15ml HF for 4 L Nitric

3.1.3. Anodizing Bath Tank

1. Take chemical Ammonium Sulfate and prepare solution 280 Liter Water with 12 kg Ammonium Sulfate (500gm pack mix with 11.9-liter water (1:0428 ratio)).

Thanks & regards,

Dear Dr. Amol,

Thanks for valuable inputs. These are very important inputs that can be used to prepare our SOP for handling / storage & disposal of the acids.
I have already written a request mail to the Principal, copy to you. Sorry for being late in this regard.

We once again appreciate your support & helping us to make a safe work environment in our industry.

Regards,
Mangesh Prabhudesal

WHEREAS:

- A. ASPCD, Established in 1972 by Devrukh Shikshan Prasarak Mandal, Devrukh, Tal Sangameshwar, is affiliated to Mumbai University, recipient of 'Mumbai University Best College Award' for the year 2009-10, and has obtained 'A' grade in the third cycle of National Assessment and Accreditation Council (NAAC) evaluation conducted in March 2016.
- B. IIPS, Established in 2008 by Prabodhan Shikshan Prasarak Sanstha, Ambav, Tal Sangameshwar, is affiliated to Mumbai University and have obtained 'B' grade in the first cycle of National Assessment and Accreditation Council (NAAC) evaluation conducted in Oct. 2017.
- C. ASPCD and IIPS desires to work in collaboration with each other for scientific research and educational activities on terms and conditions set out below.

NOW THIS AGREEMENT WITNESSETH AND IT IS AGREED BY AND BETWEEN THE PARTIES AS UNDER:

1. Purpose:

The goal of this cooperation is to foster collaboration and to facilitate advancement of knowledge on the basis of reciprocity, best efforts, mutual benefits and frequent interactions. ASPCD and IIPS agree to explore the possibility of engaging in the following modes of collaboration:

- 1) ASPCD and IIPS agree to investigate ways of identifying and inviting faculty members from both the institutions.

- 2) Conduction of extensive research in the field of Pharmacognosy, Medicinal Botany, Ethno Botany, Pharmacology, Pharmaceutics etc.
- 3) Exchange of information on research, teaching, learning materials and other literature relevant to their educational and research programmes.
- 4) **ASPCD** and **IIPS** agree to jointly identify and pursue opportunities for formulation and submission of new research project proposals and or training programmes from funding agencies. The terms and conditions of such joint research project would be worked out between the concerned investigator and the funding agency.
- 5) Joint proposal or engagement in research or training programmes sponsored by funding agencies extending invitations to each other's faculty to participate therein.
- 6) Organization of seminars, conferences, workshops and short-term continuing education programmes on topics of mutual interests, while extending invitations to each other's faculty to participate therein.
- 7) Exchange on a reciprocal basis of students at graduate level for limited period of time for purposes of education and/or research.
- 8) Exchange of faculty from **ASPCD** and **IIPS** for purpose of guest lectures and/or as a resource person.
- 9) **ASPCD** and **IIPS** agree to respect each other's right to intellectual property. All background intellectual property used in connection with this MOU shall remain the property of the party that introduces it. No license is granted to any party to use another party's background intellectual property unless specifically agreed to in writing. Further, the intellectual property rights that arises as a result of any collaborative research or joint activity under this MOU would be subject to separate written agreement(s) on the ownership and management of such intellectual property and each party agrees to respect the ownership of intellectual property of the other

parties in all dealings, consistent with officially laid down intellectual property rights policies of the partner institution.

- 10) Provision of consultancy on the campus development of both ASPCD and IIPS.
- 11) No party of this memorandum shall use the name, logo or any other designation of any of the other parties without prior written consent.
- 12) The terms of any financial management will be subject to separate agreement(s) made on a case-by-case basis; such further agreements will include the names of those persons responsible for managing the implementation etc. of collaborative activity.

2. Term of the Agreement:

The term of this MOU is for 5 (Five) years commencing from the date it is signed by representative of the two institutions. The parties may decide to further extend the term of this MOU by mutual consent on terms and conditions as may be agreed between them.

3. Further Agreements:

This MOU will be reviewed after three years; the terms of this MOU may be amended by mutual written agreement prior to the date of review. Any extension to this MOU will be formally agreed in writing by the parties.

4. Amendment/Termination of MOU

- i. Any amendment to the terms of this agreement can only be made by mutual consent of the parties.

Abstract

Background: Indole and pyrazole constitute a major class of biologically active scaffolds. The amalgamation of two or more pharmacophores would generate novel molecular templates that are likely to unveil remarkable biological properties.

Objective: An efficient and high yielding synthesis of indole-pyrazole integrated α -cyano substituted

Subject: Plants for antimicrobial study
To: nagaresk <nagaresk@gmail.com>

Dear Sir,
This year in Avishkar Research Convention we are planning to present antimicrobial activity of following 4 plants. First three are very common in Ratnagiri and other area and used as wild vegetable. Before selecting these species I have read some papers available on Internet regarding their antimicrobial activity. We have prepared leaf and stem powder of these plants which is ready for extraction. Please suggest any changes if any, from point of view of experiment.

Plant1:
Botanical Name: Clerodendrum Serratum
Local name: Bharangi
It is best used to cure respiratory system related diseases. Decoction prepared by leaves has bronchodilator effect. It is not toxic plant and its flowers and leaves are also edible. Root of this plant is bitter, dry, anti-inflammatory, digestive, carminative, stimulant, expectorant and anti-spasmodic

Plant:2
Botanical Name:Cassia tora or Senna tora
Local Name: Takla, Tarvat
It has anti-cancer potential, externally used for snake bite poisoning, it reduces cholesterol. Fresh leaves are pounded with alcohol or vinegar, it is applied externally to treat eczema and psoriasis.

Plant 3
Botanical Name:Celosia argentia
Local Name: kurdu, kombda
The flower and seed is astringent, haemostatic, ophthalmic, parasiticide and poultice. It is used in the treatment of bloody stool, haemorrhoid bleeding, uterine bleeding, leucorrhoea and diarrhoea.The seed is hypotensive and ophthalmic.

Plant 4
Botanical Name:Murraya koenigii
Local Name: kadipatta
Leaves have anti diabetic properties.The leaves, the roots and the bark of the curry tree can be used as tonics as well as a stomachic. A mixture made from the curry tree is applied on external wounds and is known to relieve bites of poisonous animals. The leaves of Murraya Koenigii are eaten raw for relieving vomiting and dysentery. The oil made of the curry tree leaves is said to contain antifungal and antibacterial properties.

Recitals

- Whereas, Ingenious Healthcare Hadapsar, Pune is a Site management organization and clinical research institute, engaged in manufacturing of quality pharmaceuticals for the benefit of the society.
- Whereas **Indira institute of pharmacy sadavali, Devrukh**, is a premier pharmacy Institute conducting degree course in Pharmacy.

Scope of MOU:

- To improve knowledge & skill base of students by exposing them with practical aspects of their professional career.
- To utilize technical manpower & thereby improve the quality of education-knowledge & skills in the students.

Aims and objectives of MoU:

- Opportunity for students & faculty to undergo industrial training.
- Opportunity for students & faculty to undergo industrial projects.
- Opportunity for students & faculty to visit industry & observe quality in services.
- To avail human resources as guest lecturers from the industry.
- Opportunity for training & placement of student in industry.
- Both the company & the institution shall evolve a mutually acceptable schedule to develop programs, hold seminars and exchange visits.
- Collaborations in the sharing of academic data, scientific information, intellectual property, articles and publications.

MEMORANDUM OF UNDERSTANDING (MOU)
BETWEEN
JAIPUR NATIONAL UNIVERSITY, JAIPUR
AND
INDIRA INSTITUTE OF PHARMACY, SADAVALI (DEVROKH)

This MOU is entered on the Saturday of 08/06/2019 by and between Jaipur National University, Jaipur (herein after called as JNU) situated at Jagatpura, Jaipur Rajasthan, the University established by State under section (2f) of the Act of UGC.

and
Indira Institute of Pharmacy, Sadavali, Devrukh (herein after called as IIP)
Tal: Sangameshwar, Dist: Ratnagiri, Maharashtra. 415804. Affiliated to University of Mumbai, Approved by AICTE, PCI, New Delhi, Recognized by DTE, Govt. of Maharashtra.

The aforesaid Institutions are hereinafter referred as JNU and IIP

1. Objectives of the MOU

- i. To promote and enhance academic interest between JNU and IIP.
- ii. To exchange the faculty and/or staff between both Institutes/Universities.
- iii. To conduct joint research activities including joint research publications.
- iv. To participate in seminars and other related academic meetings/activities.
- v. To exchange research students including UG/PG student, between both.
- vi. To exchange academic and research materials.

2. Technical Areas of Collaboration:

- i. A continuing Quality Improvement Programme of Research in the field of mutual interest between both parties.
- ii. Provide special academic interactive lectures by faculty of both Institutions.
- iii. Provide necessary help and guidance in organization of Workshops/ Conferences/ Personality Development Programme for enhancement of skills of students and faculties of both Institutions.
- iv. Provide necessary support for lectures through video conferences, satellite links and assistance in development of E-classes, establishment of research labs, training and placements at both Institutes.
- v. Joint conduct and supervision of research students including UG/PG students at either Institutes.
- vi. Facilitate training for teachers and students.

Nanocarrier Mediated Urinary Bladder Targeted Drug Delivery

Vipul Sansare, Manish Kumar Gupta and Birendra Shrivastava

Abstract

The urinary bladder has certain unique anatomical features which enable it to form an effective barrier to toxic substances diffusing from the urine into the blood. Different diseases such as interstitial cystitis, overactive bladder syndrome, urinary tract infection, and bladder cancer affect the bladder's normal function. Treatment of urinary bladder diseases with systemic drug administration suffers from several limitations such as poor bioavailability and first pass metabolism leading to a low drug concentration in bladder tissue and the subsequent need for high drug doses which may increase side effects. Such conditions may benefit from intravesical drug delivery (IDD), which involves direct instillation of drug into the bladder via a catheter, to attain high local concentrations of the drug with minimal systemic effects. IDD however has its limitations, since the permeability of the urothelial layer is very low and instilled drug solutions become diluted with urine and get washed out of the bladder during voiding, necessitating repeated infusions of the drug. New Drug-delivery systems (DDSs) for bladder disorders such as overactive bladder, interstitial cystitis, bladder cancer, and recurrent urinary tract infections are discussed in this article. Nanocarriers, polymeric hydrogels, intravesical systems, encapsulated DDSs, and gene therapy are all discussed, along with the rationale and strategies for both system and local delivery methods. We present a comprehensive overview of bladder-related DDSs, including nanotechnology and gene therapy, as well as their current and future prospects.

Keywords: urinary bladder, bladder disorders, delivery, targeted drug delivery

1. Introduction

The development of a new drug molecule is both costly and time-consuming. Individualizing drug treatment, dose titration and clinical drug

Recent Advances in Phytoactive Delivery

Vipul A. Sansare, Manish Kumar Gupta, Deepa U. Warriar and Prashant Gurav

Abstract

Plant derived phytoconstituents are well known for their therapeutic potential. It has been experimentally demonstrated that whole plant extract or isolated phytoconstituents reveal various therapeutic potentials like hepatoprotective, antimicrobial, neuroprotective, antitumor, antioxidant, skin protectives etc. Although these phytoconstituents have potential therapeutic benefits, their use is limited due to their poor bioavailability, stability in biological fluids and authentication issues. These continue to be an open problem that affects application of these valuable ancient herbal herbs in effective treatment and management of various disease conditions. A potential solution to these difficult problems could be encapsulation of phytoactives in novel colloidal particulate systems. Novel colloidal carriers like liposomes, phytosomes, proniosomes, niosomes, nanoparticles, microspheres, lipid microparticles, ethosomes as well as transfersomes were effectively utilized recently to solve drawbacks and for effective delivery of phytoactives. Several landmark studies observed better therapeutic efficacy of phytoactive loaded colloidal carrier compared to conventional drug delivery. Thus colloidal carrier based phytoactive delivery is recently developed promising and attractive strategy for better therapeutic control on disease conditions. The present exhaustive review highlights recent advances in herbal bioactives loaded colloidal carrier-based drug delivery systems.

Keywords: plant extracts, phytoactives, phytopharmaceuticals, novel drug delivery systems, colloidal carriers

Introduction

Plant extract has been used worldwide for treatment of various diseases as well as accepted by physicians and patients because of their fewer side effects [1]. Therapeutic potentials of herbs are widely reported and greatly explored in the literature by ancient Indians. Plant derived phytoconstituent based drug delivery systems are becoming more popular in the modern

Abstract

A novel coronavirus, COVID-19, was identified as the pathogenic agent (WHO). The pandemic of severe acute respiratory syndrome (SARS) and Middle East respiratory syndrome (MERS)-related coronavirus disease 2019 (COVID-19) is sweeping the world. A strange outbreak of pneumonia with no known cause occurred in Wuhan City, Hubei Province, China, in December 2019. The virus was discovered in bats in Wuhan, China, and then transferred to humans via an unknown intermediary species. COVID-19 has not yet been successfully treated with a clinically approved antiviral or vaccine. Only a few broad-spectrum antiviral drugs have been studied in clinical trials against COVID-19, and only a few have proven to be successful. The global emergence and pathogenicity of COVID-19 infection are summarized and compared in this paper.

Keywords: COVID-19, Corona virus, SARS, MERS, Pneumonia

Introduction

Coronavirus is a significant infection that mostly affects the respiratory system of humans. Previous corona virus (CoV) outbreaks include the severe acute respiratory syndrome (SARS)-CoV and the Middle East respiratory syndrome (MERS)-CoV, both of which have been labelled as major public health threats. A group of people was hospitalized to hospitals in late December 2019 with an initial diagnosis of pneumonia

scavenging potential

ABSTRACT

Objective(s): The unfavorable physicochemical properties of well recognized antioxidant phytoactive sesamol limits its oral bioavailability as well as potential application as an antioxidant drug. The aim of the study is to design and evaluate sesamol encapsulated hyaluronic acid anchored phospholipid nanovesicles to enhance its antioxidant potential.

Methods: Drug encapsulated hyalurosomes were prepared using thin film hydration method and evaluated for particle diameter, physical stability, drug encapsulation efficiency, sesamol release behavior in vitro and DPPH radical scavenging assay.

Results: The selected method was found to be effective for fabrication of phospholipid nanovesicles with particle diameter 200 ± 10.173 nm and zeta potential -29.8 ± 4.16 mV. The drug loaded hyalurosomes revealed significantly better radical scavenging potential compared to free sesamol and unloaded hyalurosomes.

Conclusions: Hyaluronic acid functionalized phospholipid nanovesicles is novel phospholipid based carrier for delivery of phytoactives. Thus formulated phospholipid based system could be acceptable system for delivery sesamol with improved antioxidant potential.

INTRODUCTION

The poor gastrointestinal bioavailability and significant metabolism via conjugation are major hurdles in oral delivery of plant based antioxidant phytoactive sesamol (SM). SM is phenolic chemical constituent isolated from sesame oil [1]. Chemically SM is [3, 4-methylenedioxyphenol]. Various landmark studies have proved liver protective and antioxidant activities of SM [2]. The solubility of SM in polar solvents is good. In addition to this, the lipophilicity of SM is also good [3]. To solve drawbacks of SM and to enhance oral

bioavailability, it need to formulate novel drug delivery system, which can release encapsulated drug in controlled manner and possibly improve drug circulation in the body.

Colloidal nanocarriers are promising nanosized particles for delivery of phytoactive [4]. novel nanovesicles like liposomes [5, 6], ethosomes [7, 8], transfersomes [9, 10], glycerosomes [11], glycerosomes [12] and hyalurosomes [13] have been investigated phytoactive delivery [14].

Hyalurosomes are phospholipid novel nanovesicles designed using phospholipid and natural polymer i.e. hyaluronic acid [15]. These

ABSTRACT

The different types of skin diseases caused due to microorganisms. In recent years the use of the traditional medicinal system was increased because of more minor side effects and cost effective. The single herbal drugs were found to be less potent, which can be improved by utilizing more than one herb in the single formulation, known as polyherbal formulation. The present work involved the development and evaluation of the different polyherbal formulations (cream, gel, and emulgel) using natural ingredients. The aim of the present work is to produce a formulation with improved antimicrobial potency and stability of formulations when compared with the individual extracts of herbal drugs. All the prepared formulations were tested against various microbial strains and concluded that the polyherbal formulations (C25, G1, EG1) were found potent against most selected strains. The prepared formulations can be used as a multipurpose formulation.

INTRODUCTION

Microorganisms are the causative agents of almost all acute and chronic diseases. Dermatologic diseases are the fourth most common cause of all human illnesses. Skin disorders cause higher year loss due to disability than other diseases such as diabetes mellitus. There are around 3000 different types of skin disorders. Intensity and symptoms of infections that are self-limiting and benign tumors, chronic inflammatory disorders, and malignant neo-

plasms are all examples of diseases that cause considerable morbidity and have a negative impact on quality of life. Antibiotics (which kill microorganisms or stop the growth of microorganisms) are the medicines used to treat different infections. Still, they may build resistance due to longer use and becomes less effective. It may produce a severe allergic reaction. It causes diarrhea, abdominal pain, vomiting, and nausea. It also kills the healthy bacteria in the body. To minimize all these drawbacks, herbal medicine has been commonly used for the treatment and prevention of diseases and health promotion, as well as for enhancement of the span and quality of life.

In many developing societies, traditional medicine, of which herbal medicine is a core part, is the only system of health care available or affordable. However, there is a lack of a systematic approach to assessing their safety and effectiveness. The holistic approach to health care makes herbal medicine very attractive to many people, but it also makes scientific evaluation challenging because many factors must be considered. Herbal medicines are in widespread use and although many believe herbal

Formulations,
Emulgel

ABSTRACT

Physical harm that causes the skin to break or open up are known as wounds. For the repair of broken anatomical continuity and compromised functional status of the skin, proper wound healing is crucial. It is the end result of a coordinated response to harm from various cell types. The contraction and closure of the wound as well as the restoration of a functional barrier are the consequences of the intricate, multifactorial process known as wound healing. Due to its lower risk of side effects and lower cost, traditional medicine has seen increased use in recent years. When more than one herb is included in a single formulation, this is known as a polyherbal formulation, and the potency of the single herbal medications is increased. The purpose of the current study was to assess an emulgel made of developed polyherbal ingredients against wound healing. The current study aims to assess the created formulation's ability to treat burns and excision wounds in terms of wound healing potential. Excise and burn wounds largely recovered. A group of rats given the medication showed signs of re-epithelialization of cells in newly formed tissue. At the healing site, there was also evidence of fibroblastic and vascular procreation. Without the presence of any microorganisms, the formulation effectively increases the rate of epithelialization and collagen viability across the wound region. According to the findings, the produced formulation (EG1) was superior to the extract in terms of effectiveness for wound healing.

INTRODUCTION

Physical harm that causes the skin to split or open up are called wounds. For the repair of broken anatomi-

cal continuity and compromised functional status of the skin, proper wound healing is crucial. It is the end result of a coordinated response to harm from various cell types. The contraction and closure of the wound as well as the restoration of a functional barrier are the consequences of the multifaceted, complex process of wound healing (Umachigi *et al.*, 2007b). A series of actions, including inflammation, cell proliferation, and cell type migration, result in the repair of damaged tissues (Sidhu *et al.*, 1999). The physiologic process of wound healing is divided into three phases: the substrate phase, the proliferative phase, and the remodeling phase (Umachigi *et al.*, 2007a). A number of cytokines, including growth factors, govern how all these actions are carried out (Pierce *et al.*, 1991). Herbal medicine is a crucial component of traditional medicine, which is

ABSTRACT

Ayurveda and Unani Medicine are the most classy and commonly practiced systems in India. In India's AYUSH systems, some 8,000 herbal remedies have been codified. Amruthotharam/Amrutottaram Kashayam is one of such preparation which takes care of metabolic disorders through inflammation. The formulation contains guduchi (*Tinospora cordifolia*), haritaki (*Terminalia chebula*), and shunthi (*Zingiber officinale*) in the ratio 6:4:2. Natural remedies obtained from wild sources; therefore, sustaining consistent product quality is difficult because of extrinsic variables including soil conditions, light and water availability, temperature changes, nutrients, and geographic location. The present work aimed to develop and validate uni-dimensional double development high-performance thin layer chromatography to standardize the marker-based compounds such as gallic acid, berberine and gingerol-6, because the power of one-dimensional chromatography is often inadequate for complete resolution of the components present in complex samples which can be improved by separating actives through UDDD.

INTRODUCTION

The term Traditional herbal medicine is a knowledge, skills, and practices relies on indigenous concepts, beliefs, as well as experiences used to maintain health also to prevent, diagnose, improve or cure physical as well as mental illness (World Health Organization, <http://www.who.int/topics/traditional-medicine/en/>). Traditional medicine is divided

into many diverse systems, each having its own philosophy and practices inspired by the geographic place as well as environmental conditions in which it first developed (WHO, 2005). Though, a prevalent concept is a holistic approach to life, which emphasizes the body, mind, also environment, as well as a focus on health rather than sickness (WHO 2005). Herb comes from the Latin word "herba" and the old French word "herbe." Together, these two words form the modern English word "herb." Today, the term "herb" can be used to refer to any part of a plant, such as the seed, flower, fruit, stem, leaf, bark, stigma, or root, also the plants that are not woody. According to the evidence, Unani Hakims, Indian Vaid, cultures from Europe and the Mediterranean, and cultures from the rest of the world have all employed plants as medicine for more than 4000 years. Indigenous communities in Rome, Egypt, Iran, Africa, and America practised healing rituals that involved the use of herbs. Other indigenous communities developed traditional medical practises, such as Unani, Ayurveda, and Chinese

<p>Article History:</p> <p>Received on: 03 Aug 2020 Revised on: 05 Sep 2020 Accepted on: 07 Sep 2020</p> <p>Keywords:</p> <p>Amruthotharam, anti-diabetic potential, traditional method, herbal formulation</p>	<p style="text-align: center;">ABSTRACT</p> <p>Diabetes mellitus (DM) is a non-communicable disease that affects people all over the world and is defined by ongoing hyperglycemia. Sulfonylureas, biguanides, -glucosidase inhibitors, and non-sulfonylurea secretagogues are a few oral hypoglycemic medications that are frequently recommended by doctors for managing diabetes. Oral hypoglycemic medication use causes noticeable negative effects, and there is currently no permanent viable treatment for DM recovery. Complementary and alternative therapies must be used to lower the incidence of disease until better medical methods are discovered. The search for an efficient medication, either by itself or in combination, to treat diabetes continues to be fruitless. This might have a viable replacement in the shape of herbal preparations, which are widely employed in conventional medical systems. In order to determine the impact of Amruthotharam kashaya prepared using a traditional method for a four-week treatment period on blood glucose levels as well as other biochemical parameters like total cholesterol, LDL, HDL, and VLDL in HFD-alloxan-induced diabetic rats, the present study was designed. Significant weight loss was also seen with diabetes management, and this was partially reversed after formulation administration. The formulation significantly decreased increased levels of a few particular biochemical markers and avoided other hyperglycemia-related complications. These findings offer scientific support for the anti-diabetic usage of a conventional formulation and imply that the administration of the formulation to rats can be used safely by humans because it lowers the levels of several biochemical factors that contribute to diabetes.</p>

Abstract---Metabolic syndrome is considered a major reason for the emergence of chronic dreadful diseases. Obesity and wrong food habit are key factors for metabolic syndrome. Globally people are affected by glucose intolerance, central obesity, hypertension, and dyslipidemia. Diabetes is a major part of metabolic syndrome. Targeted anti-inflammatory therapy has been suggested for both prevention and treatment of many of the above-said syndrome especially diabetes. Diet is an important regulatory factor in the immune response. There is considerable evidence to suggest that malnutrition leads to immune suppression due to a susceptibility to infection. On the other hand, over-nutrition leads to immune activation due to a susceptibility to an inflammatory condition. Inflammation may have an important role in the development and progression of diabetes and its complications; however, the impact of experimental anti-inflammatory treatments on diabetes deterioration over time and cardiovascular outcomes is still elusive. Thus proper diet with some drug therapy not only resolves the issue but can prevent the progression of the disease at extreme levels.

Keywords---metabolic syndrome, obesity, inflammation, diabetes, diet.

Hepatocytes targeting

ABSTRACT

Curcumin is a well-recognized antioxidant phytoactive isolated from the rhizomes of *Curcuma longa*. Numerous landmark investigations have proved the antioxidant and hepatoprotective potential of curcumin. The aim of present study was to target curcumin loaded nanocarriers to hepatocytes using asialoglycoprotein receptors targeting strategy. Mannose, a water-soluble carbohydrate, was hydrophobized by anchoring stearylamine with an objective to conjugate mannose on the surface of curcumin loaded nanostructured lipid carriers for targeting asialoglycoprotein receptors on hepatocytes. Mannose conjugated stearylamine was synthesized and characterized using various analytical techniques. The synthesized targeting ligand was incorporated curcumin loaded nanostructured lipid carriers and characterized by photon correlation spectroscopy. Zeta potential measurement was used to confirm the conjugation of the synthesized ligand to the surface of drug-loaded nanostructured lipid carriers. CCl₄ induced hepatotoxicity in male Wistar rats was used as an experimental animal model to evaluate the hepatoprotective potential of formulated drug encapsulated nanostructured lipid carriers. The hepatoprotective potential was assessed by measuring serum liver injury markers and oxidative stress parameters in the liver post-mitochondrial supernatant. Mannose conjugated nanostructured lipid carriers showed acceptable particle size which revealed its suitability for hepatocyte targeting. In addition to this, mannose conjugated nanocarriers revealed significantly better ($p < 0.05$) reduction of serum liver injury markers and proinflammatory cytokines compared to the unconjugated one which confirmed hepatocytes targeting potential of the synthesized ligand. Asialoglycoprotein receptors targeting could be a landmark strategy for hepatocyte targeting. Thus, the synthesized mannose anchored stearylamine could be a promising novel targeting ligand having hepatocyte targeting potential.

1. Introduction

Liver is a complex and specialized organ which regulates numerous biochemical functions like synthesis and metabolism of a number of complex molecules. Various liver diseases affect millions of people worldwide, which are difficult to treat with conventional drug delivery (Barnbeck et al., 2014). World Health Organization has reported 30–50% of liver cirrhosis globally due to alcohol consumption and more than 300 million cases of chronic hepatitis infections in 2020 (Vasanthkumar et al., 2017). Numerous drugs have been investigated for the treatment of diseases associated with liver, however a correct drug delivery system needs to be found for the delivery of drugs.

Majority of conventionally administered drugs are accumulated in the liver, however, the efficient therapeutic effect in diseases like hepatocellular carcinoma, hepatitis, liver cirrhosis and hepatic tuberculosis is not achieved. To overcome the limitations associated with conventional drug delivery, novel colloidal carriers like liposomes (Castangia et al., 2015; Shah et al., 2013; Tang and Ge, 2017), nanoparticles (NPs) (Guhagarkar et al., 2015; Raposo et al., 2020), solid lipid nanoparticles (SLNs) (Bonferoni et al., 2018; Kakkar and Kaur, 2012; Mohanalakshmi

MEMORANDUM OF UNDERSTANDING (MoU)

The Prabodhan Shikshan Prasarak Sanstha's Indra Institute of Pharmacy, Sadavali, Tal: Sangameshwar, Dist: Ratnagiri hereinafter referred to as the **first party** (which term the next otherwise requires shall include its representatives, successors or assignees of the second party)

And

Govindrao Nikam College of Pharmacy, Sawarde, Tal. Chiplun & Dist. Ratnagiri herein referred to as second party (which term the context otherwise requires shall include its representative success of assignees of the first party)

PREAMBLE:

- The Prabodhan Shikshan Prasarak Sanstha established Indra Institute of Pharmacy at Sadavali (Devrukh) in the year 2008 which offers B Pharmacy programme approved by PCI and AICTE, New Delhi, Recognized by the Directorate of Technical Education, Government of Maharashtra and is affiliated to the University of Mumbai. IIP is located on 6 acres of land at village Sadavali. The institute has spacious lecture halls, tutorial halls, seminar room, well-equipped laboratories, Computer Lab and a voluminous library to impart best pharmaceutical education to the students. The institute has well-equipped laboratories with highly qualified teaching faculty in all the branches. The institute is engaged in quality research and has qualified and experienced faculty.
- Govindrao Nikam College of Pharmacy, Sawarde is situated in Sawarde, Ratnagiri in the Maharashtra state of India. Established in 2005, it is approved by AICTE, the State Government of Maharashtra and DTE Mumbai, and it is affiliated to the University of Mumbai. Sawarde Pharmacy, Ratnagiri offers 3 courses namely Diploma Pharmacy and Degrees like, B.Pharm, M.Pharm. Sawarde Pharmacy campus is spread over 6.23 Acres. Hostel facility is available for the students.

Goals and Objectives

The **first party** is engaged in teaching and research in Pharmaceutical Sciences.

The **second party** is engaged in teaching and research in Pharmaceutical Sciences.

The **first party** and the **second party** have agreed to exchange the expertise and to share the infrastructural facilities for mutual benefit such as

1. Usage of instrumental facilities by the students and faculty with the prior permission of the Head of the institutes of both the parties.
2. Usage of library books, study material, etc., by the students and faculty with the prior permission of the Head of the institutes of both the parties.
3. Faculty and student exchange for mutual benefit.

Now this deed of **MOU** is agreed by and between the parties under the following terms and conditions.

Terms and Conditions:

1. The library facilities will be shared at the premises of **both parties** as per the need for work mutually agreed upon.
2. The infrastructural facilities will be shared at the premises of both parties as per the need of work mutually agreed upon.
3. **Both parties** may allow students of D. Pharm/ B. Pharm/M.Pharm to utilize the expertise of faculty and/or students of their organizations. The required books and/or study material will be issued to the students on college premises (if applicable) for their studies other than those available with the **second party** and are to be made available by the **first party** and vice versa.
4. Any publication(s) related to the work/study shall acknowledge the assistance provided (if any) by the **first party** and vice-versa.
5. All facilities shared between **both parties** shall be reviewed every six months by a joint committee appointed for the purpose of **both the parties** in order to advise on the future courses of sharing.
6. Any dispute arising shall be settled through mutual negotiations only without recourse to resolving the dispute by legal means or at the most by arbitration on mutual terms.

To,
Mr. Vipul Sansare
Dept. of Pharmaceutics,
Indira Institute of Pharmacy,
Sadavali,
Devrukh.

Dear Sir,

We are grateful to you for conduction of Seminar on "Publication of Research Article" for our Final B. Pharm and M. Pharm students on 21st February, 2022 from 10.30 to 4.30. Knowing the drafting of manuscript, quality research publishers and journals, selection of appropriate journal, communication of the manuscript are very essential for the students to publish their research work. Through effective explanation and hands on training you helped the students to understand the concept and improve their skill.

Thanking you,

Yours faithfully

Battre

**LIQUISOLID COMPACT: AN APPROACH TO ENHANCE
DISSOLUTION RATE OF DRUGS**

**Sumedha Bane *Maya T. Desai **Vipul Sansare*

ABSTRACT

The dissolution rate improvements of poorly water-soluble drugs is a major challenge for the pharmaceutical industry because of their low solubility. Due to different novel technologies, the number of candidates has increased. In that most of the drugs have highly lipophilic nature. These drugs belong to BCS (Biopharmaceutical classification system) class II and class IV. Bioavailability of poorly water-soluble drugs is limited by their solubility and dissolution rate. To counter these problems different technologies come in the market but they also have many disadvantages. The liquisolid technology as described by Spireas is a liquid which is transformed into a free-flowing, readily compressible and apparently dry powder by simple physical blending with selected excipients like the carrier and coating material. This review is mainly based on the history, advantages, disadvantages, theory, mechanism, evaluation and materials used in the liquisolid system. According to literature review the liquisolid compact has greater applicability in the pharmaceutical formulation. The liquisolid compact approaches the great improvement in the solubility of chemical entities.

Keywords: Liquisolid compacts, Solubility, Bioavailability, Carrier material, Coating material

INTRODUCTION

In the pharmaceutical industry oral dosage form is very easy as compared to other dosage forms. The oral dosage forms are convenient for patients also it does not require sophisticated machinery and complex manufacturing procedure, but the major problem of oral dosage form is that they should have high solubility. The characteristics of new chemical entities shifted toward higher molecular weight, this increases the lipophilicity therefore it decreases their aqueous solubility. It has been reported that about 40% of the drug in the development stage and 60% of synthesized drugs have poor water solubility.¹ The BCS class II and IV drug i.e. low soluble or insoluble drug in aqueous medium are very challenging to the pharmaceutical industry. Solubility is one of the major factors to achieve desired concentration of drug in the blood stream for pharmacological response.² The aqueous solubility of poorly water-soluble drug is usually less than 100 µg/ml.³ The low solubility of drug causes different problems like low bioavailability, alter the release of dosage form. There are different modifications to tackle this issue i.e. chemical modification, physical modification but they are not cost-effective due to the involvement of sophisticated machinery, advanced manufacturing techniques and more complex technology also sometimes leads to unsatisfactory results and lack of stability. In past few years different new techniques have been developed such as drug microionization, solid dispersion, co-precipitation, lyophilization, liposomes, niosomes, microencapsulation, use of prodrug and derivatization process and inclusion of drug solution into soft gelatin capsules.⁴

The most promising technique for the enhancement of water-insoluble drug is "liquisolid technique". It was developed by Spireas et al. 2002 which improves dissolution properties of water-insoluble or poorly soluble drugs by increasing surface area and wetting area. The liquisolid technique is based upon the dissolving insoluble drug in the non-volatile solvent and admixture of drug-loaded solutions with appropriate carrier and coating material to convert into acceptably flowability and compressibility to the powder.⁵ The liquisolid technique is a liquid medication converted into a dry-looking non-adherent free-flowing and readily compressible powder by a simple blending with selected powder excipients referred to as the carrier and coating material.⁶ Apart from dissolution enhancement, liquisolid technique has recently been investigated as a tool to retard drug

PSPS'S
INDIRA INSTITUTE OF PHARMACY
A Report on guest lecture 'stereochemistry'
Date: 29/08/2019

Department of Pharmaceutical Chemistry of Indra Institute of Pharmacy, Sadavali has organized guest lecture on stereochemistry on 29/08/2019. Mrs B. S. Tare, Assistant Professor, department of pharmaceutical chemistry, GNCOP, Sawarde was resource person for lecture.

It was very informative and interactive session on stereochemistry.

A Report on guest lecture 'Novel Drug Delivery System'
Date: 29/08/2019

Department of Pharmaceutics of Indra Institute of Pharmacy has organized guest lecture on 'Novel Drug Delivery System' on 29th August 2019. Mrs Maya T. Desai, Associate professor, department of pharmaceutics, GNCOP, Sawarde was resource person for lecture.

It was an intriguing and informative session wherein she explained the importance of 'Novel Drug Delivery System' in drug delivery. The objective of the lecture was to focus on the NDDS in drug delivery.

MEMORANDUM OF UNDERSTANDING

The Prabodhan Shikshan Prasarak Sanstha's Indra Institute of Pharmacy, Sadavali, Tal: Sangameshwar, Dist: Ratnagiri herein after referred to as the **first party** (which term the next otherwise requires shall include its representatives, successors of assignees of the second party)

And

Government Rural Hospital, Devrukh, Tal. & Dist. Ratnagiri herein referred to as second party (which term the context otherwise requires shall include its representative success of assignees of the first party)

PREAMBLE:

- a) The Prabodhan Shikshan Prasarak Sanstha has established Indra Institute of Pharmacy at Sadavali (Devrukh) in the year 2008 which offers B Pharmacy program approved by PCI and AICTE, New Delhi, Recognized by Directorate of Technical Education, Government of Maharashtra and is affiliated to the University of Mumbai. IIP is located on 6 acres of land at the village Sadavali. The institute has spacious lecture halls, tutorial halls, seminar hall, well equipped laboratories, Computer Lab and a voluminous library to impart best pharmaceutical education to the students. The institute has well-equipped laboratories with highly qualified teaching faculty in all the branches. The institute is engaged in quality research and has qualified and experienced faculty.
- b) The Government Rural hospital, Devrukh is one of the oldest hospital located in Devrukh offering various types of medical services to the people of Sangameshwar Tehsil.

Goals and Objectives

The **first party** is engaged in teaching and research in Pharmaceutical Sciences.

The **second party** is engaged in offering various medical services to the local community.

The **first party** and the **second party** have agreed to exchange expertise and share the infrastructural facilities for mutual benefit such as

1. Arranging various social activities related to health issues, and communicable and infectious diseases for the students and local community.
2. Arranging and participating actively in blood donation camps, health check-up camps, red ribbons activities, etc.
3. Arranging pathology lab visits for the benefit of students.
4. Sharing expertise of faculty, medical and supportive staff for mutual benefits.

National Service Scheme Unit of Indira Institute of Pharmacy, Sadavali organized one day Blood group detection camp in association with ICTC Department, Primary Health Centre, Devrukh at well known temple 'Soljai', Devrukh on 12/03/2022. The both programs were organized on the occasion of festival at Devrukh region. 20 NSS volunteers were actively involved in testing of blood group of people who visited temple. Mr. T. L. Patwardhan (Asst. Professor of Pharmacology) and Ms. A. V. Berde (Lecturer) played key role in creating awareness about blood group detection. In addition to this, 'poster exhibition' on 'HIV AIDS Awareness' was organized in association with DCAD College, Devrukh. Mrs. Snehalata Pujari and Mrs. Vidya Mane (ICTC Department) awarded helping hands for successful organization of both programmes.
